# Who we Are?

We are deal in Forex Trading. Forex is a portmanteau of foreign currency and exchange. Foreign exchange is the process of changing one currency into another currency for a variety of reasons, usually for commerce, trading or tourism. According to a recent triennial report from the Bank for International Settlements (a global bank for national central banks), the average was more than USD trillion in daily forex trading volume.

Forex, also known as foreign exchange, FX or currency trading, is a decentralized global market where all the world's currencies trade. The forex is the largest capital marketplace in the world

# Foreign Exchange Market

The foreign exchange market (Forex, FX, or currency market) is a global decentralized or over-the-counter (OTC) market for the trading of currencies. This market determines foreign exchange rates for every currency. It includes all aspects of buying, selling and exchanging currencies at current or determined prices. In terms of trading volume, it is by far the largest market in the world, followed by the credit market.

The main participants in this market are the larger international banks. Financial centers around the world function as anchors of trading between a wide range of multiple types of buyers and sellers around the clock, with the exception of weekends. Since currencies are always traded in pairs, the foreign exchange market does not set a currency's absolute value but rather determines its relative value by setting the market price of one currency if paid for with another. Ex: USD 1 is worth X CAD, or CHF, or JPY, etc.

# How can World Trade help you?

We suggest you seek the advice of a suitably qualified professional who can help you to take the relevant decisions after evaluating your personal and financial situation. Your continued attendance at this meeting indicates your acceptance of the above terms.

# How Trading Works?

## Allocation Method

World Trade Account Service allows Fund Managers to trade with the funds of multiple World Trade Investor Accounts for a pre-agreed Performance Fee (%). Profits and losses made on the World Trade Manager's Account are automatically allocated to each Investor's Account based on the amount they invested.

Here's an example to see the Profit/Loss Allocation method in action:

The funds of the World Trade Manager and Investors are all invested in the Manager's account. The amount of equity they invest determines their share of the overall investment, which results in their potential share of any profit/loss.

## Distribution of Profit/Loss

When positions on the World Trade Manager account are closed and the account balance increases, so when a Manager is profitable, the profits will be split among all Investors in the account based on their contribution.

# How Trading Works?

## Step 1

Select your  
money manager

## Step 2

Initiate your  
deposit

## Step 3

See how your  
MM performs

## Step 4

Request for  
withdrawals or  
deposits

## Step 5
